**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 28 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

When the ammonium, phosphate, thiocarbonyl or additive is at levels of 93% or more, the composition would add up to more than 100%.

***Claim Rejections - 35 USC § 103***

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-7, 32 and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by Martin (4339349).

Martin teaches a corrosion inhibitor composition which can comprise a combination of a phosphate and a quaternary amine within the scope of the present invention (see column 7 and 8 and Table I, inhibitor 5).

5. Claims 8-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. Claims 13-27, 29-34 and 36 are allowable over the art of record.
7. In a telephone conversation with Jonathan Taylor on 7/31/02 it was indicated that the claims would be allowable after a minor amendment, however in view of the Martin reference, a new rejection is presented. The amendment distinguished from the previous rejection, since the applied reference taught a benzyl compound.
